

# Babel Street

## Close the Risk–Confidence Gap

Today’s massive volume and variety of data necessitates that organizations increase global awareness and perform rapid analysis to make mission–critical decisions faster. However, most organizations do not have adequate resources to effectively address these threats — creating a Risk–Confidence Gap.

The Risk–Confidence Gap is the widening divide between the explosion of multilingual data, evolving regulations, and sophisticated AI–powered threats, versus an organization’s ability to confidently analyze and act on that information. This Gap is exacerbated by outdated systems, a lack of AI and automation, and the strain of increasingly complex regulations. The inevitable outcome is delayed decision–making processes, increased operational costs, potential regulatory penalties, reputational damage, and jeopardized security and safety of businesses and communities.

## Why Babel Street?

Babel Street understands the complexity of the Risk–Confidence Gap and the urgency to close it as organizations compete in our data–driven world. That’s why the products in the Babel Street Ecosystem allow organizations to quickly analyze vast amounts of data to derive actionable insights and make informed decisions.

Babel Street solutions transform structured and unstructured data into decision–making power, closing the Risk–Confidence Gap and empowering organizations to excel with unprecedented efficiency, foresight, and security.

## The Babel Street Ecosystem

### Babel Street Insights

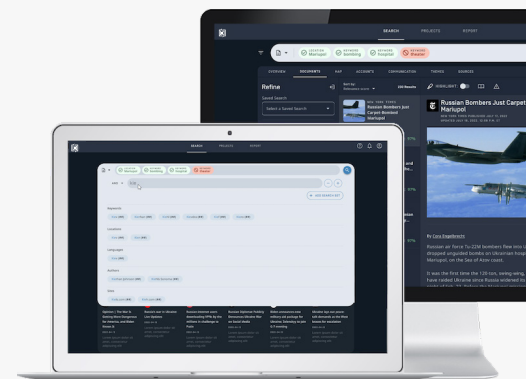

A multilingual, geo–enabled analytics platform for threat intelligence, identity resolution, and risk mitigation.

### Babel Street Analytics

Integrates artificial intelligence and natural language processing (NLP) into systems for rapid insights about people, organizations, and events.

### Babel Street Data

Specialized collections from the hardest–to–reach sources that cover virtually every industry and topic for in–depth data analysis.

## Meet the Challenges of Your Use Case

The Babel Street Ecosystem provides solutions to commercial and government entities around the world, in areas that include:

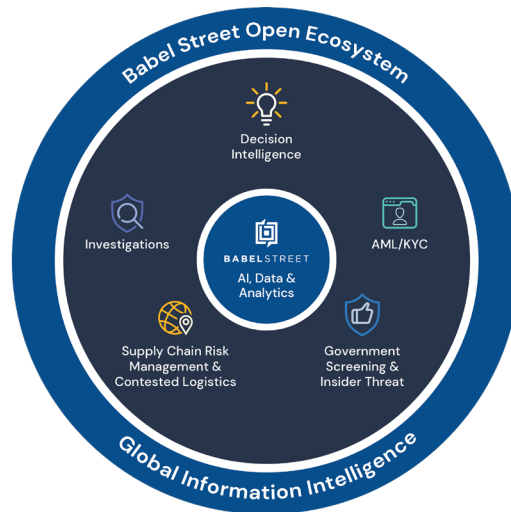

**Decision Intelligence** — Make informed decisions with confidence. Transform data into actionable insights and empower smarter decision-making with both unstructured and in-house data for strategic planning, risk assessment, and operational efficiency.

**Government Screening & Insider Threat** — Proactively mitigate risk. Reduce uncertainty around identity operations and watchlist verification. Uncover internal threats while ensuring security, compliance, and trust in data.

**AML/KYC** — Simplify compliance, reduce risk. Slash the risks involved with doing business with sanctioned entities. Ensure comprehensive due diligence with accurate screening, ongoing monitoring, and powerful adverse media checks.

**Supply Chain Risk Management** — Gain greater visibility into your supply chain. Tap the power of AI to reveal hidden risks with comprehensive data and insights. Vet vendors, make informed decisions, and understand regional and competitive landscapes.

**Investigations** — Uncover the truth faster. Expand lead sources while narrowing results to what's most relevant. Discover new avenues of investigation across people, documents, and social media.

Babel Street provides the tools to transform your identity and risk operations. We not only help you close the Risk–Confidence Gap, we position you for strategic excellence and competitive advantage.

Babel Street is the trusted technology partner for the world's most advanced identity intelligence and risk operations. The Babel Street Insights platform delivers advanced AI and data analytics solutions to close the Risk–Confidence Gap.

Babel Street provides unmatched, analysis-ready data regardless of language, proactive risk identification, 360-degree insights, high-speed automation, and seamless integration into existing systems. We empower government and commercial organizations to transform high-stakes identity and risk operations into a strategic advantage.

## Our Capabilities

The Babel Street Ecosystem provides differentiated capabilities across multiple languages and systems:

**Comprehensive data analysis** — of both structured and unstructured, as well as enterprise and publicly available data across multiple languages. We empower you to dive deeper, providing richer insights and ensuring your assessments are accurate and reliable.

**Proactive and real-time risk identification** — using advanced AI, our platform excels in identifying and alerting you to potential risks as they emerge. This continuous vetting empowers you to foresee and manage risks, ensuring a safer, more compliant operational environment.

**360-degree insights** — are derived by linking relevant data to reveal obvious and hidden connections. This approach results in comprehensive knowledge graphs that support multi-dimensional insights, bolstering your decision-making capabilities.

**Highest concentration of analysis-ready data** — with the largest pool of enriched, standardized, and searchable PAI data derived from billions of documents and thousands of petabytes of open-source information — nearly three times more than leading search engines.

**Unprecedented automation** — significantly streamlines your operations through high-speed automated searches. By managing routine monitoring tasks, our platform enables your team to redirect their focus toward strategic decision-making.

**Explainable AI** — for reliable, explainable, and transparent results. The Babel Street Ecosystem is designed with AI that you can understand, empowering you to make identity and risk decisions with verifiable confidence.
