

Babel Street Secure Access

BABEL STREET INSIGHTS

Babel Street Secure Access is a managed attribution solution that goes beyond traditional privacy tools to offer a unique combination of advanced anonymization, controlled attribution, and an isolated research environment. Secure Access empowers government analysts, law enforcement agents, and trust and safety teams to overcome geo-restrictions, protect identity, and conduct investigations with complete confidence.

When used in tandem with Babel Street Insights, Secure Access complements and extends the capabilities of our OSINT tool — giving investigators access to global data, AI-powered analytics, and sensitive information in hard-to-reach locations — free from common web restrictions.

Key Features

Babel Street Secure Access provides a comprehensive range of features to ensure isolation, anonymity, flexibility, and audit compliance.

Virtual machine isolation — Each session runs in its own secure virtual machine, fully isolated from networks and devices, ensuring maximum threat protection when browsing and analyzing downloaded files.

Zero-PII requirement — No personally identifiable information (PII) is required for access, eliminating exposure risks while maintaining uninterrupted session integrity.

Customizable, secure deployments — Launch private, isolated environments tailored to compliance and operational requirements, with flexible log delivery options.

Benefits

- Break down geographical barriers to unlock worldwide insights by bypassing geo-restrictions
- Operate anonymously in any digital landscape with unparalleled protection for sensitive research and investigations
- Shield local hardware and networks from threats during research and online engagement
- Accelerate research with persistent sessions that help overcome access barriers and behavioral analysis systems
- Collaborate seamlessly across teams with secure file management and sharing

Mobile virtual network operator (MVNO) support — Securely interact with mobile networks through a virtualized carrier for enhanced security and operational flexibility.

Comprehensive identity protection — Maintain total anonymity by masking IP address, browser fingerprint, and other identifiers, for full control over online identity.

Virtual mobile numbers — Get virtual or anonymized mobile phone numbers for two-factor authentication (2FA) and secure communication.

Flexible session modes — Choose between long-term, persona-based investigations using persistent browsing, or ephemeral sessions using non-persistent browsing depending on operational needs.

Global egress network — Leverage a worldwide network of secure egress points to bypass geographic restrictions, enabling unrestricted research and intelligence gathering.

Android OS emulation — Seamlessly access mobile-only platforms and regional apps without needing external devices or third-party tools.

Minimal-click user experience — Leverage optimized workflows that minimize friction and allow analysts to focus on research rather than navigating complex tools.

Expansive OSINT workflow integrations — Secure Access complements Babel Street Insights and provides seamless extensibility for third-party OSINT sources.

Error-proof compliance — Reduce misattribution risks, ensure compliance, and prevent common user errors with built-in safeguards.

Automated session logging — Automatically log and audit sessions for compliance, security, and internal oversight, ensuring operational transparency.

Multi-user collaboration and team controls — Enable secure collaboration with role-based access, shared research workspaces, and controlled team permissions.

Every Babel Street customer receives dedicated professional support that ensures rapid onboarding, high availability, and immediate issue resolution for mission-critical operations.

Uncover hidden truths and make informed decisions, even in the most challenging digital environments. Empower your team with unrestricted global intelligence through Babel Street Secure Access.

Babel Street is the trusted technology partner for the world's most advanced identity intelligence and risk operations. The Babel Street Insights platform delivers advanced AI and data analytics solutions to close the Risk-Confidence Gap.

Babel Street provides unmatched, analysis-ready data regardless of language, proactive risk identification, 360-degree insights, high-speed automation, and seamless integration into existing systems. We empower government and commercial organizations to transform high-stakes identity and risk operations into a strategic advantage.
